

<no> Tag Deprecated - Use CSS Instead

#no># should not be used because it has been deprecated. An alternative to #no># is the CSS white-space property. HTML-5.com is a great guide for web developers. [TV Series & Actors and Actresses](#). Follow [TV Series](#) and [HTML 5](#) on Google+.

[<no> Tag Deprecated - Use CSS Instead](#)

Avoid the Deprecated <no> Tag in HTML 5

The `<no>` tag should be avoided because it is not included in the HTML specifications. White space wrapping should be controlled using the `<abbr>CSS</abbr>` [white-space property](#) and line breaks should be created using the [HTML break tag](#) "`
`".
