### Changes in HTML 5 - <legend> Tag

#### What's new in HTML 5

#### Differences between HTML 5 and earlier versions of HTML

The following attributes should *not* be coded on the <legend> tag because they either have been deprecated or were never officially supported:

- `align`

The [2000-2010 Recommendations from the W3C HTML Working Group](#) defined the [HTML namespace](#) for the `legend` element type name along with the names of all [HTML element types](#). In older (pre-2000) [versions of HTML](#), element type names were not associated with a namespace.
