[HTML class attribute](#)

The `class` attribute in HTML

Examples

```
<p class="center">Alignment of this paragraph will be  
determined by the settings of the CSS ".center" style.</p>
```

Google Translate class attribute

Although it is a misuse of the class attribute, Google Translate recognizes the specific value `notranslate`, indicating that the content of the element should not be translated into other spoken languages (see <http://translate.Google.com/support/> Google Translate - General information for webmasters).

Examples

```
<span class="notranslate">...</span>
```
