### HTML <figcaption> Tag

> itemscopehttp://data-vocabulary.org/Breadcrumbitemprop="title">Examples</span>

#### The <figcaption> Tag in HTML 5

The <figcaption> tag is used to put a caption above or below a [figure](#) in HTML. The **figcaption** element is one of the [phrase elements in HTML](#).

#### Figure with caption

```
<figure> </img>
    <figcaption>Example of HTML <figure> with <figcaption></figcaption> </figure>
```

This is an actual working example of the [<figcaption> tag example code](#) below.

#### <figcaption> Tag Syntax

```
<a mode="pre" href="../body-tag/index.html#syntax"><body></a>
...
<a mode="pre" href="../html-tag-list.html#flow-content-model">... flow content expected ...
<a mode="pre" href="../figure-tag/index.html#syntax"><figure></a>
    <b mode="pre"><figcaption></b>
        <a mode="pre" href=".../definitions/index.html#flow-content">... flow content ...</a>
    <b mode="pre"></figcaption></b>
    <a mode="pre" href=".../definitions/index.html#flow-content">... flow content ...</a>
</figure>
...
<a mode="pre" href="../html-tag-list.html#flow-content-model">... flow content expected ...
<a mode="pre" href="../figure-tag/index.html#syntax"><figure></a>
    <a mode="pre" href=".../definitions/index.html#flow-content">... flow content ...</a>
    <b mode="pre"><figcaption></b>
        <a mode="pre" href=".../definitions/index.html#flow-content">... flow content ...</a>
    <b mode="pre"></figcaption></b>
</figure>
...
</body>
```

#### Rules for coding HTML **figcaption** elements

Make sure you understand the [difference between a tag and element](#) and are familiar with the [definitions of namespace](#) and other [HTML terms](#).

1. Include a **figcaption** element inside a [figure element](#) where [flow content](#) is expected.
2. Begin the **figcaption** element with a starting <figcaption> tag. The element name uses lower case letters and should be in the [HTML namespace](#), which it will pick up automatically from the [xmlns attribute](#) on the <html> tag.

3. Inside the **figcaption** element, between the `<figcaption>` starting tag and the `</figcaption>` ending tag, code the inner HTML **flow content** for the figure caption.
4. End the **figcaption** element with a matching `</figcaption>` closing tag.

## Content of the figcaption element

The content of the **figcaption** element can include [HTML comments](#), [text content](#) and any [tags that can be used in flow content](#).
