Changes in HTML 5 - <progress> Tag

What's new in HTML 5

The <progress> tag is one of the new elements in HTML 5.

Differences between HTML 5 and earlier versions of HTML

The <progress> tag did not exist in older versions of HTML.

The [2000-2010 Recommendations from the W3C HTML Working Group](#) defined the [HTML namespace](#) for the names of all [HTML element types](#), which now includes the **progress** element name. In older (pre-2000) [versions of HTML](#), element type names were not associated with a namespace.
